Subject:	Lab software for fall
Date:	Tuesday, April 25, 2017 11:01:00 AM

Good morning,
The end of academic year is quickly approaching and it is time to start thinking about what software will be needed for the fall semester. We need to have our images built and ready to deploy to the lab computers and classroom instructor stations no later than August 1. In order to accomplish this task we need to have the software requests no later than June 1.
Below is a list of the basic software that will be installed on all lab and instructor stations computers. Note the one major change is that we will be deploying Windows 10 to the labs this year. There are also 6 computers in the open lab that have some specialty software installed. If you have additional software requests please get them to me as soon as possible. In addition any software that will require purchasing additional licenses or a new license please work with me to get a quote for consideration by your department chair.

All Labs

- Windows 10
- Office 2016
- Acrobat Pro
- IE, Chrome, and Firefox and their java and flash plugins

Special Software Pod

- Windows 10
- Office 2016
- IE, Chrome, and Firefox and their java and flash plugins
- Acrobat Pro, Photoshop, Illustrator
- Visual Studio

Thank You,

Mike Campbell
