Academic Honesty

The College Catalog expresses the following general expectation about academic honesty:

The administration, faculty, and staff at Cerro Coso Community College believe that students are entitled to the finest education that the college can make available to them. At the same time, however, a student's achievement and proficiency in subject matter must include the realization that there are standards of academic honesty which should prevail in all one's endeavors.

Accordingly, this realization further requires that each student exert every effort to maintain these standards.

More detailed information about academic honesty can be found in the entries on "Student Conduct" and "Cheating and Plagiarism."
