Bakersfield, CA 93301**

Dear Kern Community College District:

This letter is to inform you that an internal and external Vulnerability assessment was conducted on May 2, 2023 for KCCD's computer network.

The technical assessment was conducted utilizing CIS Critical Security Controls (CIS Controls) as well as Cyber Insurance Readiness guidelines. The CIS Controls consist of 18 overarching measures that help strengthen KCCD's cybersecurity posture. The assessment consisted of automated scans in conjunction with a review by an Internal Assessor. The report contains both direct evidence of compliance along with attestations by the Internal Assessor based on a review of materials and supporting documents. The ResoluteGuard Team shall contact you later this year to conduct another Vulnerability assessment and to discuss the scope of work completed and your customized Cybersecurity plan of action.

Thank you for your full cooperation.

Sincerely,

**Jeff Schobel
Chief Executive Officer**
